

Leveling up: Advancing Your Camera Skills

Nov. 7, Thursday, 6:00 – 8:00PM

\$18.00/person

Mike Crivello's, 18110 W. Bluemound Rd., Brookfield

This one session class is for interchangeable lens camera owners who feel comfortable with basic photo concepts (ISO, shutter speed, aperture), but are unsure about diving into deeper functions of their cameras. This class will explore the control panel on most cameras, discussing white balance, motor drive, light metering and in-camera color/palette profiles. We will also discuss common menu options. This class is for people who are “out of the green zone” but maybe don't use their camera enough to feel fully confident with what their camera is capable of doing.

Basic Camera Operations

Nov. 16, Saturday 10:30-12:30PM

\$18.00/person

Mike Crivello's, 18110 W. Bluemound Rd., Brookfield

This short class is for new owners of interchangeable-lens cameras. The class will help students discover basic functions of their camera, from as ground-level as “how to hold the camera”, to understanding a camera's playback options, to understanding how different types of lenses create different types of photos. The class will also explore the different exposure modes available on most cameras. This class is designed as a “get you started” class for those who have not owned an interchangeable-lens camera before.

Basic Camera Operations

Nov. 23, Saturday, 10:30-12:30PM
